## DETAILED ACTION

### *Election/Restriction between Product and Method*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, drawn to a product, classified in class 257, subclass 59.
  - II. Claims 13-22, drawn to a method, classified in class 438, subclass 149.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP ' 806.05(f)). In the instant case the product as claimed can be made by a materially different process such as forming the semiconductor device by forming the semiconductor layer containing a one-conductive type and the source/drain wirings through a liftoff process. In this way, no parts from semiconductor layer containing a one-conductive type need to be removed later with the source/drain wirings as masks, which is not readable on the claimed method.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

***Election/Restriction among Distinct Species***

2. In addition, claims in Group I directed to semiconductor device are further restricted as follows:

This application contains claims 1-12 directed to the following patentably distinct species of the claimed invention:

1. Embodiment of Figs. 1A-1B and 2A-2B, with or without one or more of Figs. 8, 10, 11 and 12.

2. Embodiment of Figs. 3A-3B and 4A-4B, with or without one or more of Figs. 8, 10, 11 and 12.

3. Embodiment of Figs. 3A-3B and 5, with or without one or more of Figs. 8, 10, 11 and 12.

4. Embodiment of Figs. 2A-2B and 6, with or without one or more of Figs. 8, 10, 11 and 12.

5. Embodiment of Fig. 7.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none is generic.

3. Applicant is advised that a reply to this requirement, to be complete, must include an election of the invention to be examined, even though the requirement may be traversed (37 CFR 1.143). **And**, if electing claims from invention I, the election must include an identification of the species that is elected consonant with this requirement,

and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP ' 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
